

SUSPECTED ADVERSE DRUG REACTION REPORTING FORM

For VOLUNTARY reporting of Adverse Drug Reactions by Healthcare Professionals

BHARAT DRUG SAFETY COMMISSION Pharmacovigilance Programme								FOR AMC/NCC USE ONLY		
A. PATIENT INFORMATION 1. Patient Initials R.P. 2. Age at time of event or Date of birth 32 years 3. Sex ☒ M ☐ F ☐ Other 4. Weight 65 Kg								AMC Report No.		
								Worldwide Unique No.		
B. SUSPECTED ADVERSE REACTION 5. Date of reaction started (dd/mm/yyyy) 03/03/2026 6. Date of recovery (dd/mm/yyyy) 06/03/2026 7. Describe reaction or problem Patient (32-year-old male, 65 kg) was diagnosed with acute bacterial sinusitis and prescribed Tab. Amoxicillin 500 mg three times daily for five days. Amoxicillin was started on 01/03/2026. On 03/03/2026 he developed generalized itching and skin rashes over the chest. The drug was stopped the same day and the patient was treated with antihistaminics. He recovered completely by 06/03/2026.								12. Relevant tests / laboratory data with dates None reported		
								13. Relevant medical / medication history (e.g. allergies, race, pregnancy, smoking, alcohol use, hepatic/renal dysfunction etc.) Diagnosis: acute bacterial sinusitis. No history of allergy. No family history of diabetes or hypertension.		
								14. Seriousness of the reaction ☐ Yes ☒ No If Yes, please tick any one of the following: ☐ Death (dd/mm/yyyy) ☐ Congenital-anomaly ☐ Life threatening ☐ Required intervention to prevent permanent impairment/damage ☐ Hospitalization/Prolonged ☐ Other (specify) ☐ Disability		
								15. Outcomes ☒ Recovered ☐ Recovering ☐ Not recovered ☐ Fatal ☐ Recovered with sequelae ☐ Unknown		
C. SUSPECTED MEDICATION(S)										
S.No	8. Name (Brand/Generic)	Manufacturer (if known)	Batch No. / Lot No.	Expiry date (if known)	Dose used	Route used	Frequency (OD, BD, etc.)	Therapy dates		Indication
								Date started	Date stopped	
i	Amoxicillin (Tab.) (Generic)	Not known	Not known	Not known	500 mg	Oral	TID	01/03/2026	03/03/2026	Acute bacterial sinusitis

9. Action Taken ☒ Drug withdrawn ☐ Dose increased ☐ Dose reduced ☐ Dose not changed ☐ Not applicable ☐ Unknown							10. Reaction reappeared after reintroduction? ☐ Yes ☐ No ☒ Effect unknown Dose (if reintroduced): Not reintroduced			
11. Concomitant medical products including self-medication and herbal remedies with therapy dates (Exclude those used to treat reaction) None reported							D. REPORTER DETAILS			
							16. Name and Professional Address: Sudipa, Pharmacy Student Intern, SNU Pin: _____ E-mail: _____ Tel. No. (with STD code): xx3848xx Occupation: Pharmacy student intern Signature: _____			
17. Causality Assessment: Probable / Likely (WHO-UMC)							18. Date of this report (dd/mm/yyyy) 03/10/2026			
Additional Information: Treatment of reaction: antihistaminics. Dechallenge positive (reaction resolved after the drug was withdrawn); rechallenge not done. Suspected reaction type: Type B hypersensitivity (allergic) reaction to a penicillin-class antibiotic. Severity: mild. Preventability: not preventable (no previous history of drug allergy). Advice: record amoxicillin/penicillin allergy in the patient file and avoid re-exposure.										
Confidentiality: The patient's identity is held in strict confidence and protected to the fullest extent. Programme staff is not expected to and will not disclose the reporter's identity in response to a request from the public. Submission of a report does not constitute an admission that medical personnel or manufacturer or the product caused or contributed to the reaction.
